Francisco at Arizona:

You have the videotape. Dave Simon never made the sound tape. So I think we have no transcript. Would you please ask Bud if he has it?

I'd like to quote him directly on the second wound being ballistics and enlarged by surgery. But not enough for you to take the time to write Arizona and ask for a transcript unless they published the entire symposium. If they did I'd expect Bud to have it. And that it would be good to have.

I am now more certain than before that he can wind up a figure of key importance in this before it is all over - many seeing possibilities in him and his wor(s).
